

UNIT 7: SHAPES

Dear Parents/Guardians,

We had fun in school discovering different shapes, sizes and patterns! We learned four main shapes. We counted the number of corners and sides each shape has.

We also learned that some solid shapes have flat surfaces. Solid shapes can be stacked, rolled or slid depending on their surfaces.

Discover the many shapes in your home with your child!

KEY WORDS

shapes side roll patterns
corner slide stack

These are **shapes**.

rectangle

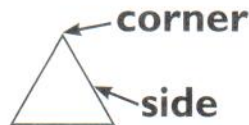

square

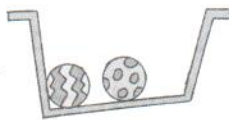

circle

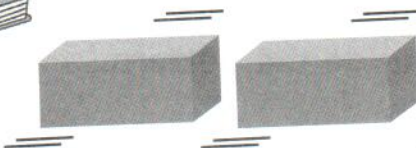

triangle

These can be **stacked**.

These can be **rolled**.

These can **slide**.
