

## ACTIVITY 1

Play a simple card game with your child.

- Make 4 cards with each card cut in one of the four shapes – rectangle, square, circle and triangle.
- Label each card with the name of its shape.
- Take two cards, and give the other two to your child.
- Both you and your child have 10 minutes to find as many objects that match the shape on the given two cards.  
For example, if the cards show a rectangle and a circle, you can pick a remote control and a round button.

## ACTIVITY 2

- Have fun with shapes and their patterns.  
Ask your child to trace out the shapes on the cards.  
Trace each shape about 5 times on separate papers.
- Now, use the traced-out shapes to form patterns, such as square, rectangle, circle, square, rectangle, circle.
- Ask your child, “Which comes next?” and encourage him or her to place the correct shape beside the pattern.
